RocketClip Crack Free License Key [March-2022]

Keyboard macros, or keyboard shortcuts, can be a great way to quickly get things done, but managing them is a chore.

RocketClip takes care of that.

RocketClip includes a full range of keyboard macros that are even integrated into the menu bar and

Favorites sections of the app. These macros can perform various actions including launching any program, taking a screenshot, saving any clip to a favorite, and more. #1 Keyboard Macro Management - Task Organizer Keyboard macros are an incredible time-saver. RocketClip makes managing them a breeze. RocketClip allows you to create, edit, and assign keyboard shortcuts to macros. Quickly launch any

application or save your selection to a clipboard history. It can even launch any custom URL or open any installed Microsoft Store app. RocketClip's keyboard macros will not only make your life easier, they'll make your computer much more productive. #2 Preview

Clipboards and Favorites for Windows 10 RocketClip can automatically preview and manage the contents of your clipboard and windows favorites.

You can save the highlights to a clipboard history or a favorites section in one step. Get back to what you were doing faster with keyboard shortcuts and one-click restores. #3 Launch Windows Apps with Command Line or Scripts RocketClip supports launching Windows apps from command line or scripts. You can set up keyboard shortcuts to launch any program in the right window, any program with the latest and greatest updates, or

you can even schedule a task to launch the application on the next day, week, or month.

RocketClip has you covered.

And that's pretty much it! It's a simple and clean interface, and it's designed to be easy to use, almost fool-proof to set up, and it's backed by a full lifetime of support and updates. What else can you ask for? One can't deny that RocketClip is one of the best clipboard managers around. It has a simple interface and a

simple interface alone is what makes it as good as it is. Although it's a paid app (and to be honest, some users may actually not mind it being paid since they will be getting a LOT more than just a simple clipboard manager), RocketClip has all the features that one could ask for. And no wonder because it was actually designed with the idea that users should have a simple, smooth, and very powerful clipboard manager that

they could rely on to take care of
all their clipboard issues. If

RocketClip is a multi-use application launcher, shortcut manager, image capture tool, script editor and clipboard manager. With RocketClip you can pin shortcuts, add custom shortcuts, set up automatic shortcuts, pin recent apps, add custom apps to the recent apps menu, set keyboard shortcuts, add batch scripts and scripts to the clipboard, preview the

current clipboard and launch apps on the system, take screenshots and launch applications using keyboard shortcuts. RocketClip supports Microsoft Windows, Linux, OSX and Ubuntu platforms. The trial version includes 100 actions and 100 custom shortcuts. Key Features: **Keyboard shortcuts: Add to favorites: Allows adding custom shortcuts to the favorites menu. Shortcut and file pinning: Allows pinning shortcuts and

files to the favorites menu for easier access. Search by name: Allows the user to search for any file (by name or extension) in the clipboard. Search by extension: Allows the user to search for any file (by extension) in the clipboard. Search files: Allows the user to search for a file on the system (Windows, Linux, OSX and Ubuntu) using extensions, filenames, and types. Launch an app from the clipboard: Allows the user to

launch any app from the clipboard using keyboard shortcuts. Preview the clipboard: Allows the user to preview the current clipboard contents. Launch any application from the clipboard: Allows the user to launch any application from the clipboard. Pin apps: Allows the user to pin apps to the application list. Shortcuts: Allows users to easily launch applications, documents, scripts or any text. **Logging scripts

and shortcuts: The log contains the following information: Script id: The unique identifier of the shortcut or script. Shortcut: The name of the shortcut. Shortcut id: The unique identifier of the shortcut. File: The name of the file. Shortcut's target: The target of the shortcut (application, document, script, file). Shortcut's path: The path of the shortcut (in the users system). Shortcut's arguments: The arguments of the shortcut (if any). Shortcut's

description: The description of the shortcut (if any). **Main Window: The main window is used to control the most common functions and features. This window also shows, at a glance, the total number of custom shortcuts (shortcuts that are not included in the default set), number of shortcuts pinned to favorites,
